DETAILED ACTION

Ex Parte Quayle

This application is in condition for allowance except for the following formal matters:

Claims 1 through 5 are objected to because of the following informalities:

In claim 1, line 23, recitation of "the terminal portion" is not consistent with the "plurality of terminal portions" established in line 21. A proper phrase may have been intended to be - - each terminal portion - -.

In claim 1, line 27, the term "it" is not descriptive, and may have intended to be - - the moving member - - for clarity.

In claim 1, line 30, the term "patterns"

In claim 1, line 32, the phrase "heat-melted" is incomplete and should be changed to -- heat-melted material - -.

In claim 1, line 33, the term "portions" should be changed to - - branch - - to be consistent with the page 7, lines 35 and 36.

In claim 1, line 35 (final line), the term "another" should be changed to – other --, since the phrase "each another" is grammatically incorrect.

In claim 5, line 2, there is no antecedent basis for the "second permanent magnet" since a second permanent magnet has not been established in the instant claim 5 and base claim 1.

Appropriate correction is required.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Concerning claim 1, the prior art of record fails to teach or suggest a buckle assembly having the structural combination wherein the frame includes a coupling groove for determining the position to be coupled with the multi-purpose buckle sensor assembly and a coupling surface to be engaged with a hook portion of a base plate and for supporting the ejector on a bottom thereof, supporting the slider against the inner upper surface of an arched supporting beam thereof and pivotally rotating the locking lever at its rear end is characterized in that: a multi-

Art Unit: 3677

purpose buckle sensor assembly comprises a hall sensor portion including a hall sensor and a printed circuit board electrically connected to each other, which are enclosed in one package; the base plate including a metal pattern with a plurality of terminal portions for control signal and power sources of a positive voltage and a negative voltage, each terminal portions having a certain pattern adaptable formed adjacent a terminal block to an electronic circuit, and a supporting plate including a plurality of terminal seats for connecting the connecting ends of control and power lines to the terminal portions; and a movable member including guiding means for freely moving the movable member on the base plate cooperating with the ejector, a first permanent magnet mounted at its center portion and a pair of contact terminals mounted on its lower surface and for being traveled on the metal pattern contacting with it least one of the patterns of the metal pattern; and, a terminal block in the form of a fork having three branches at the front portion and including at least one branch enclosing the connecting ends of the control and power lines electrically coupled to each other with the control terminal portions in corresponding power terminal seats.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Conclusion

Prosecution on the merits is closed in accordance with the practice under Ex parte Ouayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Sandy whose telephone number is 703-305-7413. The examiner can normally be reached on M-F (7:30-4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, J.J. Swann can be reached on 703-306-4115. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
